Detailed Action

Response to Amendment

1. Applicant's arguments filed on 5/31/2005 regarding claims 1, 3-12, 14-25 have been fully considered. Claims 2, 13 have been canceled by the Applicant.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The present application relates to providing an apparatus to perform a method for monitoring ATM cells in a communication system, including the unique steps of:

“wherein the receive interface part includes: a second storage part outputting a data corresponding to the latched VPI/VCI of the cell; a third storage part outputting a VPI index value of an address designated by the data outputted from the second storage part; and a fourth storage part storing the number of error occurrence of the cell at the other address designated by the VPI index value.”

The closest prior art, Nobuyasu et al. (USP 6,445,683), discloses a BTS interface in the base station controller for monitoring ATM cells by recording the cells to be monitored, by counting the number of cell header errors, and filtering the cells according to the VPI/VCI value. However, Nobuyasu fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
